DETAILED ACTION

Response to Amendment

Amendments and response received April 6, 2009 have been entered. Claims 1, 3 and 4 are present in this application. Claim 6 has been canceled by this amendment. Amendments and response are addressed hereinbelow.

Allowable Subject Matter

1. Claims 1, 3 and 4 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any subsequent prior art which teaches a device-specific, physical and optical dot- gain reducing method for multi-level color-image halftoning regarding the output of a selected color-imaging multi-level halftone output device with respect to which individual pixels within a dot may have different intensities comprising creating a pixel-and-color-specific dot-gain reduction curve which relates, as data points for each output color of the device, selected corrections in device per-pixel pixel infeed intensity to different pre-selected, specific, multi-level, halftone geometric dot patterns wherein the patterns collectively represent the halftone dot-pattern population characteristics of an expected multi-level, per-pixel-intensity-

corrected, halftoned color image and for each pixel, determining in which pre-selected multi-level, halftone dot pattern that pixel effectively lies and is associated as the contained subject pixel, and the output color intended for that pixel. Wherein, the created dot gain reduction curve is appropriately applied to the subject pixel thereby reducing both physical and optical dot gain contributions.
